### **Election/Restrictions**

1. The inventions are distinct, each from the other because of the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-75 drawn to a method, article or system on deriving a target group through available search techniques for further survey-oriented communication over a network environment, classified in class 709, subclass 200.

II. Claims 76-111 drawn to method, article or system on defining a first and second target groups having specific (e.g., management) relationship for further assessment of the first group by collecting surveyed information from the second group, classified in 705, subclass 1.

2. The inventions are distinct, each from the other because: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as automated human resource management arrangement. See MPEP 806.05(d).

Art Unit: 2154

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Arthur Ortega at (212) 765-5070 on March 4, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made because Mr. Ortega was unreachable.
